

2004 Lincoln LS Parking Lamps

The BROWN/GREEN and WHITE/BLUE wires must be cut and shorted together isolating the switch using an 1800ohm resistor to activate park lamps. Two relays are needed to isolate each wire from the switch and are wired as shown using negative parking lamps.

IMPORTANT! This wiring information is being provided free of charge on an "as is" basis, without any representation or warranty. It is the dealer's responsibility to verify any circuit before interfacing with it using a digital multi-meter.
